

Fuel Policy

Gemini Print Solutions is committed to reducing the environmental impact of its fleet operations and supporting responsible fuel management practices. This policy forms part of our wider environmental commitments.

To improve vehicle efficiency, reliability, and emissions performance, Gemini Print Solutions uses branded diesel and petrol fuels from the following preferred suppliers wherever reasonably practicable:

- Shell
- Esso
- BP

These fuels incorporate additive packages designed to enhance engine performance, improve fuel combustion, reduce deposits, and lower emissions. The use of branded fuel supports improved miles per gallon, reduced maintenance requirements, and greater operational reliability.

Drivers are required to:

- Refill vehicles at a preferred filling station whenever reasonably practicable.
- Plan to refuel in advance and refill once the fuel tank reaches approximately one quarter capacity to avoid operational disruption.
- Use standard grade fuel unless otherwise specified.

Fuel from supermarket filling stations should be avoided unless absolutely necessary. Where no preferred supplier is available, only sufficient fuel should be purchased to reach a preferred filling station.

This policy supports Gemini Print Solutions' objective to operate an efficient, low-emission fleet while maintaining high standards of service delivery and environmental responsibility.
